

## BWC Financial Education Held Financial Investment Techniques Sharing Event in The Open University of Nanhai

On 23 April, 2015, BWC Financial Education held a Financial Investment Techniques Sharing Event in the Open University of Nanhai (OUNH). We invited the students of OUNH to share their investment plans and strategies, in order to inspire other students in terms of their investment plans. Additionally, we also invited Stephen So, vice-president of Financial Technical Analysts Association, as our speaker to introduce the basic concepts in technical analysis and teach the students professional ways to analyse different asset classes.

The event was held successfully with the students all willing to share their own views of investment despite their mixed investment experiences.

After the event, the participants, including teachers and students, all stated that they were inspired by the speech from Stephen So. Moreover, the students also showed great interests in enrolling to our technical analysis courses in the future.

**成就未來，无限可能**
